

DRYZONE™ Drysuit & Waders Dryer Works!

The DRYZONE™ unique heat-free drying action is the best way to dry & protect high performance materials like crushed neoprene, latex & synthetic membranes. Proven to prolong the life of drysuits, waders & other similar equipment, it also improves insulation, comfort & performance. DRYZONE™ crystals dry without electricity, regenerating quickly to provide years of protection.

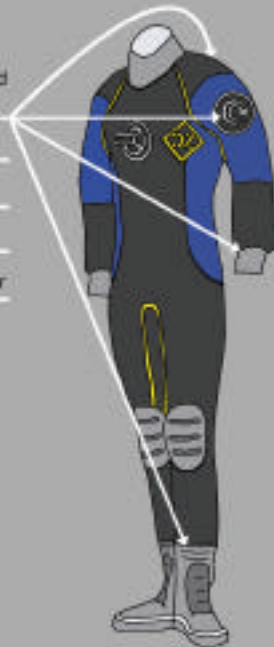

Protects valves, zips, seams and seals from corrosion & decay

Kills bacteria & fungal spores

Neutralizes unpleasant odours

Improves insulation & comfort

Prolongs the active life of gear

Winner – ISPO Award for Sports Innovation
